

## PRODUCT

### NEB DT-50 Square Base Dektite

#### Product description

NEB DT-50 square base flashing is a lead free flashing made from rubbers containing isobutylene EPDM, an inner smooth soft aluminium mesh and butyl self-adhesive layer. The product consists of aluminum expandable

mesh cast in environmentally friendly polymer rubber. It is a high performing product, efficient, easy to apply with strong UV resistance. It can be stretched, safe to use and is lightweight with strong tear. The flexible composition enables it to self-weld on laps.

The product is a non-bituminous flashing tape that will provide a waterproof seal. It is ideal for roof flashing solution, sealing of chimneys and when flashing between brickwork and conservatories. Other applications include sealing leaking roofs, dormers, rooflights, solar panels etc.

#### Product feature& specifications

Appearance / color	Black (RAL9011), Grey(RAL7043), Red(RAL 8004)
Length stretch ability	up to 50%
Width stretch ability	up to 15%
Solid content	99%
Density	1.4-1.7g/cm3
Tensile strength	>2Mpa
Temperature resistance	-40℃ to +100℃
Life time	up to 20 years
Shelf life	12 months in original packing
Storage	stored in dry& cool condition
Material	EPDM-lead zinc sheet-butyl tape
Pipe size	6.35-50.8mm
Base size	450*280mm

#### Product size

Thickness(MM)	Length(M)	Width(MM)
2	5	280
2	5	300
2	5	370
2	5	560

Or according to customer's requirement

#### Packing detail

Name	packing detail pcs/ per carton	Carton size LxWxH (cm)	carton weight ( kg)
NEB DT-50	25pcs	85x32x23cm	15.5kg
