

PRODUCT

Solar Panel Mesh Kit

PVC coated solar panel mesh, is designed to stop pest birds and prevent leaves and other debris from getting under solar arrays, protecting the roof, wiring, and equipment from damage. It also ensures unrestricted airflow around panels to avoid fire hazard caused by debris. The mesh qualify the features of long-lasting, durable, non-corrosive. This no drill solution provides long lasting and discreet exclusion to protect home solar panel.

Advantage of product

- ① Fast and easy to install, no gluing or drilling necessary.
- ② It does not void warranties and can be removed for servicing.
- ③ Non-invasive installation method that neither pierces the solar panel nor the roof covering
- ④ It is better than using spikes or repellent gels, 100% effective when properly installed
- ⑤ long-lasting, durable, non-corrosive
- ⑥ Reduce the cleaning and maintenance requirements for solar panels
- ⑦ It is specifically designed and intended for use in excluding all species of birds from roosting and nesting solar panel arrays

Product feature & specifications

Wire Diameter/After PVC Coated Diameter	0.7mm/1.0mm , 1.0mm/1.5mm , 1.0mm/1.6mm
Mesh Opening	1/2"X1/2" mesh,
Width	4 inch , 6 inch , 8 inch , 10 inch
Length	100ft / 30.5m
Material	Hot dipped galvanized wire , electro galvanized wire , stainless steel wire
Remark: Specification can be customized according to customers' request	

Per carton contains

1:30 Meter galvanized or PVC coated Solar Panel Weld Mesh Roll
2:60 Solar Panel Mesh Clips

Packing detail

3.1kg of each carton, 96 cartons per pallet, pallet size :1.1m*1.1m*1.05m
